	YEAR ENDED MAY 31st	
	1959	1958
Income	\$2,944,517	\$2,616,878
Operating and Maintenance Expense, except depreciation	1,082,741	1,001,962
Interest on bonds and notes; also amortization of debt discount and expense	600,046	542,732
Allowance for depreciation	310,219	279,666
Net earnings	951,511	792,518
Earnings employed in the business <i>(since May 31, 1951)</i>	4,201,227	3,249,716
Total Water Plant at cost	27,260,971	24,232,438
Net Additions to Water Plant	3,028,533	2,493,763
Customers (Active Services)	61,578	57,563
Miles of Mains in Service	970	903
Fire Hydrants in Service	6,457	6,167
Water Production (Million Gallons)	5,755	5,494

The Chairman's Letter

Details of the Authority's progress during the fiscal year ended May 31, 1959, will be found on the pages of the report which follow. These show a continuation of the growth the Authority has experienced since commencing active operations eight years ago. Following the temporary recession in business and employment of the previous fiscal year, building activity has again increased. There were 4,015 new customers added to the system as compared with 3,230 in the previous twelve-month period. Revenues increased \$327,639 over the previous year to a total of \$2,944,517.

Net earnings available for debt service totalled \$1,861,776, an increase of \$246,860. Interest on bonds and notes was \$577,938, and combined debt service, including amortization, totalled \$946,088. Net earnings before interest and depreciation for the South Bay Division equaled 2.03 times debt service requirements, and for the Huntington-Babylon-Sag Harbor Division, 1.85 times debt service requirements.

As of May 31, 1959, the Authority was serving 61,578 customers. This is an 84% increase over the 33,457 customers it acquired from predecessor companies. The Authority is now serving an estimated population of 225,000 or about 38% of the population of the County.

During the fiscal year covered by this report, the Authority issued \$2,500,000 South Bay Division Water Works Revenue Bonds, Series E, which were sold December 30, 1958. The proceeds were used in part to redeem \$1,600,000 of Bond Anticipation Notes. After setting up the requisite Debt Service Reserve Fund and paying the expenses relating to the issue, the balance was transferred to the New Construction Fund, to be used for capital improvements.

The new, centrally located Administrative Headquarters building was occupied in May, and the Operating Headquarters building at this location will be fully occupied in October. The latter building already houses the Authority's new laboratory which has been equipped with the most modern instruments and staffed with competent personnel. To safeguard the quality of Authority water, this laboratory is currently making chemical and bacteriological analyses at the rate of more than 5,000 samples a year.

Operating as it does in proven territory, the Authority's credit rests on the earning power of its properties, on proper reserves and other safeguards to protect its bondholders, and on its record of maintaining expanding operations on a self-supporting basis.

FOR THE MEMBERS OF THE AUTHORITY

CHAIRMAN

October 22, 1959

The Year in Review

Gross revenue for the fiscal year ended May 31, 1959 amounted to \$2,944,517, an increase of \$327,639 over the previous year. This increase reflects the addition of 4,015 new customers and 290 fire hydrants to the system and the increase in water rates which became fully effective June 1, 1958. Home construction increased substantially during the past year and the Authority was providing service to 61,578 customers at the end of its fiscal year.

Operating and maintenance expense, excluding depreciation, increased from \$1,001,982 to \$1,082,741, or in amount of \$80,759. The major part of this increase was for expenses related to the growth of the business. Wages of operating personnel were increased approximately 6½% in June 1958, and comparable increases were made to administrative employees. Maintenance expenses were increased substantially, particularly for work on the distribution system and storage facilities.

The provision for depreciation for the fiscal year was \$310,219 and the accumulated depreciation reserves since acquisition of the properties stand at \$1,429,039.

Net earnings before interest and depreciation (balance available for debt service requirements)

increased from \$1,614,916 to \$1,861,776. Net earnings, after deducting interest on bonds and notes, bond redemption premium, amortization of debt discount and expense, and depreciation, amounted to \$951,511 as compared to \$792,518 in the previous fiscal year. Total earnings employed in the business between 1951 when the Authority became actively engaged in water works operations and May 31, 1959, amounted to \$4,201,227. These earnings were used principally for water plant improvements and extensions and for the retirement of debt. A considerable amount was invested in new facilities to build up the earning capacity of the Authority.

Debt service requirements (annual interest on outstanding bonds and notes, principal of bonds maturing serially, and sinking fund requirements of bonds redeemable through sinking fund) for the year ended May 31, 1959 were \$605,963 for the South Bay Division and \$340,125 for the Huntington-Babylon-Sag Harbor Division. Net earnings before interest and depreciation for the year ended May 31, 1959 for the South Bay Division equaled 2.03 times debt service requirements and for the Huntington-Babylon-Sag Harbor Division equaled 1.85 times debt service requirements.

The balance sheets and statements of earnings for each Division, and combined for the Authority, included in this report, have been certified by Price Waterhouse & Co. under date August 7, 1959.

Port Jefferson district office and pumping station.

Four

New Stony Brook pumping station (before landscaping).

Expansion and Improvements of Properties

Total expenditures for new construction after allowance for retirements amounted to \$3,028,533. Of this amount, housing developers advanced to the Authority, under refunding contracts for main extensions, the sum of \$893,629.

New wells and pumping stations were placed in service at Bay Shore, North Brightwaters, Huntington and Stony Brook. A 500,000-gallon elevated storage tank was erected at Port Jefferson and a 1,500,000-gallon standpipe at Huntington Station. The Authority now has in service 97 operating wells, 27 pumping stations, and storage facilities having a combined storage capacity of approximately 9,000,000 gallons.

The Authority has in progress a construction program to provide additional water supply facilities having a capacity of approximately four million gallons per day and for the erection of three additional elevated storage tanks having a total capacity of two million gallons.

*Drilling rig for new deep well
at Port Jefferson.*

*More than 5,000 samples per year are analyzed
in the Authority's new laboratory.*

The Authority has reached an agreement with the State University of New York to construct a new water plant including adequate storage facilities to provide the water supply for the new State College at Stony Brook and the surrounding areas.

The new operating center, recommended by Stone & Webster Engineering Corporation, has been completed at Oakdale. The Administration Building is now occupied by the management staff, engineering, accounting and billing departments, which were previously housed at several different locations. The Operating Building already houses the Authority's new laboratory which has been equipped with the most modern instruments and staffed with competent personnel. Water samples are analyzed under the supervision of a qualified sanitary chemist.

The operating, maintenance, construction and meter shop staff will be moved to the new Operating Building by the end of October.

The Members of the Authority have adopted construction budgets for the fiscal year ending May 31, 1960 in amount of \$3,749,011.

Acquisition of Properties

As detailed below, the Authority is negotiating for the acquisition of three existing properties, subject to certain necessary approvals. These properties are estimated to add approximately 9,100 customers to the Authority's system.

Negotiations with Northport Water Works Company to acquire its physical property at Northport, L. I., are now in progress. This Company supplies water service and fire protection to approximately 7,500 homes in the Incorporated Villages of Northport and Asharoken and certain sections of the Towns of Huntington and Smithtown. Although the original property was built many years ago, the rate of growth in the Company's territory has been such that it was necessary to increase its plant more than twofold during the last five years. The Authority's consulting engineers indicate that its water supply and storage facilities are adequate. The agreement provides for a base price, with the final cost to be determined in accordance with the total assets transferred to the Authority at the closing.

On September 15, 1959, the Authority entered into an agreement with the Indian Head Water Company, Inc., to acquire its physical property at Commack, L. I. This Company supplies water service and fire protection to approximately 1,300 homes. The distribution system and three pumping stations were all constructed within the last four years. The acquisition cost depends on the number of customers and hydrants in service at the time of closing, but is estimated at \$550,000. The Authority's engineers are of the opinion that the Company has a surplus of water. It is planned to connect the system to the Authority's Kings Park distribution system so as to utilize this surplus water at Kings Park and, in return, the latter district's storage facilities will provide more adequate storage for the Commack area.

The agreement for the acquisition of the Indian Head property and the proposed agreement for

the acquisition of the Northport property stipulate that they are subject to approvals of the New York State Water Power and Control Commission, the New York State Public Service Commission, the Board of Supervisors of Suffolk County and the Authority's Advisory and Consulting Engineers. In the event that any of these approvals are not granted, the agreements may be terminated.

Pending acquisitions of properties may add 10,000 accounts.

The Authority has also reached an agreement with the Town of Babylon to acquire the distribution system of the Amity Harbor Water District, which now supplies approximately 300 customers. The Authority already supplies water to the District by contract with the Town, so that no pumping or storage facilities are involved in the acquisition. Public referendum was held and the taxpayers voted in favor of the Authority's proposal. The estimated cost of acquiring this system, and making certain improvements thereto, is \$52,500. The Authority has made application to the State Water Power and Control Commission for approval of this acquisition.

The Authority believes the earning power and the growth prospects of all three of these properties make them desirable acquisitions in conformity with its long-range policy of providing water service to the residents of Suffolk County.

Financing

The Authority's need for new money is related primarily to its capital additions. During the past year the net increase in Water Plant totalled \$3,028,533. Funds for new construction were internally generated in part by income after debt service, including tapping fees and depreciation reserves. Other sources were cash advances on construction loan contracts for pipe line extensions and borrowed money.

On December 30, 1958, the Authority sold an issue of \$2,500,000 South Bay Division Water Works Revenue Bonds, Series E. The proceeds were used in part to redeem \$1,600,000 of Bond Anticipation Notes previously issued to finance the construction program of that Division. After setting up the requisite debt reserve fund and paying the expense relating to the issue, the balance was transferred to the New Construction Fund to be used for capital improvements to the South Bay Division during the latter part of the fiscal year ended May 31, 1959 and the first part of the fiscal year which began June 1, 1959.

Following the Authority's custom, that portion of the budget, not covered by the other sources above mentioned, will be provided by bond anticipation notes, pending the sale of long-term obligations. In the event the Authority, during the current fiscal year, takes title to any or all of the new properties referred to elsewhere in this report, the Authority proposes to increase the amount of its contemplated bond issue by an amount sufficient to finance these acquisitions.

Rules and Regulations

The Authority recently amended its regulations for water main extensions by increasing the allowance to 70 feet of pipe for each bonafide customer on a public highway. In order to assist potential customers where the distance averages more than

70 feet per house, the Authority has instituted a standard form of surcharge plan whereby the customers pay a 9% per annum surcharge for the cost of the excess footage of pipe, the surcharge to cease after fifteen years.

Cooperative Work OF U. S. GEOLOGICAL SURVEY 1958-1959

The Authority is continuing to participate with the United States Government, the New York State Water Power and Control Commission and the County Board of Supervisors in financing ground water and surface water studies of the U.S. Geological Survey in Suffolk County.

These studies include maintenance of data on long- and short-term fluctuations of the ground water table in 340 wells; stream-gaging of surface water discharge at 11 stations and monthly precipitation records at 21 stations. The average of 1958 annual precipitation at these stations was 55.58 inches for Suffolk County. Data was also assembled on pumpage for public supply, industrial and agricultural use.

Chemical and bacteriological examinations of 500 samples per month are made to assure customers of water which is safe and of high quality.

Personnel

The able and conscientious efforts of the 200 men and women employed by the Authority made possible another year of successful operations. A friendly relationship is maintained by the Authority with Local 393, Utility Workers of America, A.F.L.-C.I.O., which represents the majority of its employees. Under the terms of a two-year contract with the Union which expires in June 1960, a wage increase of 4% was effective in June 1959 for union employees, and a comparable increase was made for those in the managerial staff.

The large majority of Authority employees are now active participants in the New York State Employees' Retirement System and the New York State Health Insurance Program. Retirement benefits are retroactive to the original date of em-

ployment by the Authority, and both programs include contributions by the Authority and the participating employees.

Under the Authority's policy of improving its service, it employs the following consultants:

W. V. Burnell, Consulting Engineer.

Stone & Webster Engineering Corp., Advisory Engineers.

R. W. Pressprich & Co., Financial Advisors.

Leggette, Brashears & Graham, Consulting Ground-Water Geologists.

In addition, the Authority avails itself of the advice of the representatives of the Suffolk County Health Department.

Opinion of the Independent Accountants

The firm of Price Waterhouse & Co., independent accountants, was appointed by the Members of the Authority, in accordance with the terms of the Bond Resolutions to audit the books, records and accounts of the Authority for the year ended May 31, 1959.

To the Members of
SUFFOLK COUNTY WATER AUTHORITY

In our opinion, the accompanying balance sheets and related statements of earnings of Suffolk County Water Authority present fairly the financial position of the South Bay Division, the Huntington-Babylon-Sag Harbor Division and the Authority at May 31, 1959, and their results of operations for the year, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year. Our examination of these statements was made in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

(See Notes to Financial Statements)

Notes to Financial Statements MAY 31, 1959

NOTE A:

The Authority's bonds are payable as to principal and interest only out of revenues of properties operated by the division that issued them. After certain dates, bonds are redeemable in the inverse order of their maturity, except that Series B bonds of the Huntington-Babylon-Sag Harbor Division are redeemable by lot, at prices in excess of principal amount, which prices vary according to the redemption date.

The bonds of the South Bay Division bear the following annual interest rates: (1) Series A— $2\frac{3}{4}\%$, (2) Series B-D— $3\frac{1}{2}\%$ as to \$2,110,000 maturing 1960 to 1988 and 5% as to \$770,000 maturing 1989 to 1994, and (3) Series E—5% as to \$100,000 maturing 1960 to 1964, 4% as to \$1,200,000 maturing 1965-1987 and 4.1% as to \$1,200,000 maturing 1988 to 1996. Series A bonds in the amount of \$4,400,000 mature serially in annual amounts which increase from \$130,000 in 1960 to \$235,000 in 1984 and \$2,680,000 mature in 1985. Series B-D bonds mature serially in annual amounts which increase from \$40,000 in 1960 to \$140,000 in 1994. The Series E bonds mature serially in annual amounts which increase from \$20,000 in 1960 to \$200,000 in 1996.

The bonds of the Huntington-Babylon-Sag Harbor Division bear the following annual interest rates: (1) Series A— $2\frac{3}{4}\%$ as to \$390,000 maturing 1960 to 1962, 3% as to \$1,395,000 maturing 1963 to 1971 and $3\frac{1}{4}\%$ as to \$3,065,000 maturing 1972 to 1985, and (2) Series B— $3\frac{1}{2}\%$. The Series A bonds mature serially in annual amounts which increase from \$125,000 in 1960 to \$265,000 in 1985. The Series B bonds mature on June 1, 1988 but sinking fund payments require the redemption of bonds in annual amounts which increase from \$10,000 in 1960 to \$315,000 in 1988.

The Authority's resolutions authorizing the bond issues require that all revenues be deposited in the name of the fiscal agent and allocated to specific funds.

NOTE B:

A substantial portion of cash represents moneys received from the New Construction Fund held by the fiscal agent and from housing developers to be used solely for new construction.

NOTE C:

Debt service requirements (annual interest on outstanding bonds and notes, principal of bonds maturing serially, and sinking fund requirements of bonds redeemable through sinking fund) for the year ending May 31, 1959 were

\$605,963 for the South Bay Division and \$340,125 for the Huntington-Babylon-Sag Harbor Division. Net earnings before interest and depreciation for the year ended May 31, 1959 for the South Bay Division equaled 2.03 times debt service requirements and for the Huntington-Babylon-Sag Harbor Division equaled 1.85 times debt service requirements.

Debt service requirements of the bonds for the next five years ending May 31 are as follows:

<i>Fiscal Year</i>	<i>South Bay Division</i>	<i>Huntington- Babylon- Sag Harbor Division</i>
1960	\$666,128	\$336,338
1961	663,330	337,550
1962	666,443	338,625
1963	663,258	334,463
1964	666,118	335,063

NOTE D:

The Authority is negotiating to purchase the physical assets of the Indian Head Water Company and of Northport Water Works Company.

In July 1959, the Huntington-Babylon-Sag Harbor Division issued \$300,000 of $2\frac{1}{2}\%$ Bond Anticipation Notes, Series C, which mature July 1, 1960. These notes were issued under a resolution adopted by the Authority in June 1959 which authorized the issuance of \$1,500,000 of Series C bonds of the Huntington-Babylon-Sag Harbor Division.

*One-million-gallon-per-day
pump unit being checked at Huntington.*

Facts about the Suffolk County Water Authority

The Suffolk County Water Authority is a public benefit corporation. It operates by virtue of the provisions of the Public Authorities Law of the State of New York. The Authority is empowered to survey the water resources of the County and prepare plans for their development, subject to the approval of the State Water Power and Control Commission. It is authorized to acquire, construct, develop, and operate a public water supply system in Suffolk County. The Authority has no power to levy any taxes. It is dependent on revenues to operate its business.
