Suffolk County Water Authority

AUTHORITY MEMBERS

RICHARD D. ZEIDLER, *Chairman*

EDWARD McGOWAN, *Secretary*

HERMON L. BISHOP, *Treasurer and Assistant Secretary*

RICHARD E. ALLEN

MATTHEW B. KONDENAR

LOUIS W. WEINFURT, *General Manager*

HOMER F. GARDNER, *Assistant General Manager and Chief Engineer*

HERBERT C. KOEHLER, *Assistant General Manager—Distribution*

KENNETH L. MORRIS, *Assistant General Manager—Commercial Office Operations*

EUGENE SIDOTI, *Controller*

J. LEONARD NEWMAN, *Chief Accountant*

FRANKLIN S. KOONS, *Executive Secretary*

VAN NOSTRAND & MARTIN, *Counsel*

N. F. FENN, *Resident Engineering Consultant*

WILLIAM V. BURNELL, *Consulting Engineer*

STONE & WEBSTER ENGINEERING CORPORATION, *Advisory Engineers*

UNITED STATES TRUST CO. OF NEW YORK, *Fiscal Agent*

PRICE WATERHOUSE & CO., *Independent Accountants*

R. W. PRESSPRICH & CO., NEW YORK, *Financial Advisors*

The Year's Results in Brief

YEAR ENDED MAY 31st

	1965	1964
Revenues	\$ 7,263,966	\$ 6,285,936
Operating and Maintenance Expense, except depreciation	2,774,634	2,314,890
Interest on bonds and notes; also amortization of debt discount and expense	1,581,793	1,351,376
Allowance for depreciation	783,575	678,917
Net Earnings	2,123,964	1,940,753
Earnings employed in the business <i>(since June 1, 1951)</i>	13,512,609	11,388,645
Total Water Plant at cost	72,298,228	62,345,503
Net Additions to Water Plant <i>(excluding property acquisitions)</i>	9,811,255	8,366,207
Customers (Active Services)	122,831	112,331
Miles of Mains in Service	1,900	1,727
Fire Hydrants in Service	11,609	10,719
Water Production (Million Gallons)	14,729	12,382

Chairman Zeidler and General Manager Weinfurt inspect the current work of the U.S. Geological Survey with Mr. B. L. Foxworthy, Hydrologist in Charge of the mid-island program.

The Chairman's Letter

In the fiscal year which ended May 31, 1965, the Authority continued the pattern of growth which it has experienced since it commenced producing and distributing water in 1951. During the year, 10,500 new customers were added, increasing the total number of active customers to a new high of 122,831. Accompanying this growth, 890 new fire hydrants were placed in service, bringing the total to 11,609. The Authority estimates it is now serving one-half the population of Suffolk County.

In August 1964, the Authority sold \$17,000,000 of Water Works Revenue Bonds, Series I, with a final maturity of June 1, 2002. These bonds carried an "A" rating and were sold at a net interest cost of 3.4994%. The proceeds of these bonds were used to redeem the outstanding Huntington-Babylon-Sag Harbor Division bonds, thereby effecting a consolidation of divisions; also for the payment of outstanding Bond Anticipation Notes; for expenses of the issue, and to provide new moneys for the Authority's construction program.

In March 1965, \$5,000,000 of Bond Anticipation Notes, Series J, were issued and sold at an average interest rate of 2.3025%. These notes carried a maturity date of September 14, 1965. The proceeds of these notes provided funds for new construction pending the sale of a new Series J \$15,000,000 bond issue which was sold August 25, 1965, at a net interest cost of 3.46294%. Sufficient funds are now available for the Authority's construction program through May 31, 1966.

Full financial details, together with tables of statistics, will be found in the pages that follow, from which the growth of the Authority's operations and its financial progress may be traced.

The water resources of the United States and the water problems attendant upon a rising population have been appearing in the news with increasing frequency. Consequently, it may be in order to re-state the facts regarding the adequacy and the quality of Suffolk County's water resources. Rain, sleet and melted snow percolating through its porous soil are the only source of the County's supply. The average precipitation over a long period of years has been 42 inches per year, much above the national average of some 30 inches. An estimated one-half of this precipitation percolates into the porous sands and gravels of Long Island, which range in depth from 200 to 2,000 feet above bedrock. This water cycle represents a constant recharge of water supplies available to the residents of Suffolk County. Leading authorities estimate that the average annual recharge to the underground water table is sufficient to support a population of 3,340,000 people at a daily rate of consumption of 140 gallons per person per day—twice the present daily average usage. The latest available estimate of Suffolk County's population issued by the Long Island Lighting Company places the total at 893,470 at January 1, 1965.

Conservative forecasts of future growth indicate that, barring unforeseen contingencies, the Authority's business will continue to increase at approximately its present rate.

For the Members of the Authority

Chairman

October 1, 1965

Review of the Year's Operations

In keeping with the continuing growth of Suffolk County, the Authority's program for new construction was correspondingly high and the results of the year's operations bore out original forecasts.

During this period, 10,500 new customers were added, reaching a total of 122,831 at the year end. Included in this total were 72 added through acquisition of one private company—the Shorehaven Water Corporation in the Patchogue area.

Not included in the above total were four water districts which purchase their water from the Authority, which districts had 5,910 custom-

ers as of May 31, 1965. The water services of the Authority, therefore, extended to a total of 128,741 customers—or to an estimated 450,000 residents, comprising about one-half of the population of the County.

Water production for the fiscal year was 14,729 million gallons—an increase of 19% over the preceding year. At the year end, the Authority had a daily plant capacity of 147,496 million gallons. The peak day's pumpage was 90,626,000 gallons.

Revenues for the year reached a total of \$7,263,966, as compared with \$6,285,936 in the previous fiscal year, an increase of 15.6%.

Net earnings before interest and depreciation, namely, earnings available for debt service, were \$4,489,332, or 2.12 times debt service.

At the close of the fiscal year, \$13,512,609 of the Authority's plant value represented earnings of the Authority reinvested in the business.

Above—Built in 1930, this 330,000-gallon standpipe is still in service in the Smithtown area.

Below—This modern elevated storage tank, built in 1964 (East Hampton area), holds 550,000 gallons.

Financial Review

At the beginning of the fiscal year, a balance of \$545,712 remained in the New Construction Fund held by the Fiscal Agent.

In order to provide funds for budgeted construction and to effect the planned consolidation of divisions, a new Series I Bond Issue was authorized. The initial resolution, on April 30, 1964, was for \$4,500,000 Series I bonds, against which authorization \$800,000 of Bond Anticipation Notes dated June 29, 1964, were sold with interest rates of 1.85% and 2% per annum. A month later an additional \$1,500,000 of Series I notes with interest rates of 2.125% and 2.15% were sold. These notes carried maturity dates of December 1, 1964.

The above-mentioned resolution authorizing the Series I Bonds was replaced by a resolution adopted July 29, 1964, increasing the Series I Bond Issue to \$17,000,000. This issue was sold on August 26, 1964, at a net interest cost of 3.4994%. These bonds were dated June 1, 1964, maturing serially to the year 2002. After the issuance of these bonds, \$11,975,729 was distributed to the Huntington-Babylon-Sag Harbor Division irrevocable Redemption Fund in trust with the United States Trust Company of New York for the purpose of providing payment for bonds outstanding in this division. \$2,300,000 was applied to the payment of outstanding

Series I Bond Anticipation Notes, \$527,599 was deposited in the Debt Service Reserve Fund, and the balance was earmarked for payment of bond issue expenses and to provide approximately \$2,000,000 of new moneys for the current construction program.

In the second half of the 1964-65 fiscal year, a new financing program was undertaken, under which plans were formulated for a \$15,000,000 Series J Bond Issue to provide sufficient funds for construction during the balance of the fiscal year, as well as for the 1965-66 budgeted construction program. A resolution was adopted in January 1965 for the issuance of \$5,000,000 Series J Bond Anticipation Notes. These notes were sold on March 3, 1965, at an average interest rate of 2.3025%, scheduled to mature on September 14, 1965.

On August 25, 1965, competitive bids were accepted for \$15,000,000 Series J bonds at an average interest cost of 3.46294%. These bonds are dated June 1, 1965, and mature serially to 2002. Of the proceeds, \$3,302,250 is to be used to pay and redeem certain Series B-D 5% bonds and all outstanding Series E 4% and 4.1% bonds. The savings in interest is calculated to be approximately \$30,000 per annum over the life of the bonds redeemed. The balance of the proceeds is to be used to retire the \$5,000,000 Series J Bond Anticipation Notes; for debt service reserve; for legal, administrative and incidental expenses of the issue, and to pay into the New Construction Fund approximately \$5,860,000.

Construction

During the fiscal year 1964-65, new construction completed by the Authority reached a total of \$9,991,416—again the largest program in Authority history. In addition, \$141,471 was invested in the purchase of existing water properties. Retirements totalled \$180,162, thus leaving the net figure of additions to water plant at \$9,952,725.

Included in additions to water plant were 173 miles of pipelines and 890 hydrants, increasing the totals in service to 1,900 miles of pipelines and 11,609 hydrants at the end of the year.

At the start of the budget year, nineteen (19) new wells and nine (9) new pump stations were under construction or in the planning stage.

By the end of the year, sixteen (16) of these new wells and seven (7) new pump stations were completed and in service. These figures include

one (1) new well and pump station added through the acquisition of the Shorehaven Water Corporation.

Improvements in the Port Jefferson area included completion and placing in service of a new 1,300,000-gallon storage tank, together with a 450-foot well of 1,000-gallon-per-minute capacity. Population increase in this fast-growing area has been such that a second well was planned for this site and is nearing completion.

Another improvement started in March is a new district commercial office building to serve the Huntington area. The community is commencing an urban renewal program, and this attractively designed building, shortly to be occupied, is receiving favorable comment from the public. The present district office is located in a converted pump station building constructed by the Huntington Water Company in 1890.

Plant Facilities

At Acquisition (1951, 1953, 1960, 1961, 1963 and 1964)

As of May 31, 1965

*Based on 24-hour Operation

**Includes acquisition of Shorehaven Water Corporation (72 Services and Well rated at 140 GPM) on 8/11/64

Management and Personnel

On March 22, 1965, Mr. Matthew B. Kondenar was appointed by the County Board of Supervisors to a five-year term as a Member of the Authority to fill the vacancy created by the resignation of Mr. Adrian F. Mason.

Mr. Kondenar is President of Kondenar Bros., Inc., a contracting organization engaged principally in excavating, grading and asphalt paving. He was elected Superintendent of Highways of the Town of Smithtown for six terms, serving from 1948 through 1959. He has been active for

many years in several civic and service organizations in Suffolk County.

Mr. N. F. Fenn, who had served as General Manager of the Authority during its entire operating history and who had been on extended sick leave, returned to limited duty in February 1965. In order to retain the benefit of his experience with the Authority and predecessor companies, he was appointed Resident Engineering Consultant. Mr. L. W. Weinfurt, who had been Assistant General Manager and who had served as Acting General Manager during Mr. Fenn's absence, was appointed General Manager effective February 17, 1965.

A two-year collective bargaining agreement with Local No. 393, Utility Workers' Union of America, became effective on June 16, 1964,

and provided for a 4½% general wage increase for the first year and a 4% increase effective June 15, 1965. Comparable increases were also made for personnel not covered by the contract.

At the close of the fiscal year which ended May 31, 1965, personnel on Authority payrolls had increased to 353 as compared with 340 a year earlier.

The Members of the Authority take this opportunity again to thank its employees for their wholehearted cooperation and through whose efforts the rapid expansion of the Authority has been possible.

Port Jefferson Harbor with the Water Authority's newest storage tank in the foreground.

Cooperative Water Resources Investigations

The cooperative program of water resources investigations conducted largely by the U. S. Geological Survey, in financial cooperation with the Water Authority, the Suffolk County Board of Supervisors, and the Federal Government, is being continued. This program has been in existence since the inception of the Authority in 1951.

Ground water levels are measured periodically in 90 wells and, in addition, the U. S. Geological Survey continues to collect well records, pumpage data, core samples, etc. Stream gaging records are compiled according to schedule at 11 regular stations in the County. Surface water measurements are made periodically and precipitation data at Suffolk County sites are collected and compiled. Samples are collected bimonthly from most of the streams in the County, and certain chemical constituents are monitored. Last year, 282 stream and well samples were examined by the Authority Laboratory.

During the past two years, a program of Mid-Island exploration has been conducted under contract with the U. S. Geological Survey. The contract covers test borings and observation wells at locations where the Authority wishes information regarding water-bearing potentialities of the strata. Information obtained during the construction of these observation wells will be utilized later in the development of production wells as the need arises.

During the past year, 198 samples of water from wells were collected and delivered to the Water Authority Laboratory for analysis. The results are scheduled for interpretation and summarization during the present fiscal year.

Opinion of the Independent Accountants

The firm of Price Waterhouse & Co., independent accountants, was appointed by the Members of the Authority, in accordance with the terms of the Bond Resolutions to audit the books, records and accounts of the Authority for the year ended May 31, 1965.

To the Members of Suffolk County Water Authority

In our opinion, the accompanying balance sheet and statement of earnings present fairly the financial position of Suffolk County Water Authority at May 31, 1965, and the results of its operations for the year, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year. Our examination of these statements was made in accordance with generally accepted auditing standards and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Price Waterhouse & Co.

Mineola, L. I., N.Y.
July 30, 1965

New district commercial office nearing completion on Spring Road, Huntington, which district serves 12,000 customers.

(See notes to financial statements)

Notes to Financial Statements MAY 31, 1965

NOTE A:

The Authority's resolutions authorizing the bond issues require that all revenues be deposited in the name of the fiscal agent and allocated to specific funds. After certain dates, bonds are

redeemable in the inverse order of their maturity at varying prices in excess of principal amount depending upon the redemption date. The bonds bear annual interest rates and mature as follows, exclusive of current maturities:

Series	Interest Rate	Principal Amount	Maturity*	
			Date	Annual Amounts
A	2¾ %	\$ 3,580,000	1984	\$150,000 to \$ 235,000
A (Term)	2¾ %	2,229,000	1985	77,000 to 263,000
B-D	3½-5 %	2,600,000	1994	55,000 to 140,000
E	4-4.10 %	2,375,000	1996	25,000 to 200,000
F	4.10-5 %	5,375,000	1998	30,000 to 350,000
G	4-5 %	4,440,000	2000	20,000 to 500,000
H	3½-5 %	5,450,000	2001	25,000 to 1,100,000
I	3½-5 %	16,790,000	2002	215,000 to 1,000,000
		<u>\$42,839,000</u>		

*The bonds are serial bonds which mature in increasing annual instalments, except that \$2,229,000 of the Series A bonds are term bonds which mature on June 1, 1985. However, the resolution authorizing this issue provides for the retirement of the term bonds in increasing annual amounts out of the sinking fund accumulated for this purpose. The annual maturities shown for serial bonds represent the amounts maturing in 1965 and in the last year of their term, respectively, and the required sinking fund payments have been treated as maturities for the term bonds.

NOTE B:

A substantial portion of cash represents moneys received from the New Construction Fund held by the Fiscal Agent and from housing developers to be used solely for new construction. In addition, the Bond Proceeds Fund is similarly restricted.

NOTE C:

Debt service requirements (interest on bonds and notes, principal of bonds maturing serially, and sinking fund requirements) for the year ended May 31, 1965 were \$2,114,441. Net earnings before interest and depreciation for the year ended May 31, 1965 equaled 2.12 times debt service requirements. Debt service requirements of the bonds for the next five years ending May 31 are as follows:

Fiscal Year	Amount
1966	\$2,148,960
1967	2,146,420
1968	2,143,178
1969	2,140,410
1970	2,136,463

NOTE D:

Coincident with the issuance of Water Works Revenue Bonds, Series I, on September 16, 1964, the operations, assets, and liabilities of the Authority's two former divisions were consolidated. The proceeds from the sale of the Series I Bonds were used, in part: (1) to redeem and pay the principal of and the redemption premium on all Series A and B Water Works Revenue Bonds of the Huntington-Babylon-Sag Harbor Division, and (2) to establish a redemption fund maintained by the Fiscal Agent to be applied irrevocably to the payment in full of the principal, redemption premium and interest on the Huntington-Babylon-Sag Harbor Division Water Works Revenue Bonds, Series C, at the earlier of maturity or June 1, 1968, at which time the then outstanding Series C Bonds shall be redeemed. At May 31, 1965, there remained unredeemed \$2,925,000 of such Series C Bonds.

The redemption premium on the Huntington-Babylon-Sag Harbor Division Water Works Revenue Bonds, Series A and B, and the redemption premium and accrued interest to the date of redemption on such Series C Bonds were added to unamortized debt discount and expense and are being amortized over the remaining lives of the original issues. Income earned by the redemption fund investments is being credited to the unamortized debt expense.

NOTE E:

On January 21, 1965, the Authority authorized the issuance of \$7,500,000 of Water Works Revenue Bonds, Series J, and subsequently approved the issuance of \$5,000,000 of Bond Anticipation Notes dated March 3, 1965, with interest rates of 2.20% to 2.43% per annum. These Notes will mature September 14, 1965. The resolution authorizing the Series J Bonds will be superseded and replaced by the resolution, adopted as of July 19, 1965, authorizing \$15,000,000 Water Works Revenue Bonds, Series J.

The proceeds from the sale of the Series J Bonds are to be used: (1) to redeem and pay the principal of and redemption premium on all outstanding Series E Bonds and \$770,000 of Series B-D 5% Water Works Revenue Bonds maturing 1989 through 1994; (2) to pay the outstanding Bond Anticipation Notes; and (3) to increase the Debt Service Reserve Fund as required by the resolution and the supplemental resolution. The remaining proceeds shall be used to pay the expenses of the issuance and sale of the Series J Bonds and the cost of new construction.

Facts about the Suffolk County Water Authority

The Suffolk County Water Authority is a public benefit corporation. It operates by virtue of the provisions of the Public Authorities Law of the State of New York. The Authority is empowered to survey the water resources of the County and prepare plans for their development, subject to the approval of the State Water Resources Commission. It is authorized to acquire, construct, develop and operate a public water supply system in Suffolk County. The Authority has no power to levy any taxes. It is dependent on revenues to operate its business.
